

BREEDPLAN Compatible Software Tips

There are currently a number of commercially available computer programs that are compatible with BREEDPLAN. These programs include capabilities such as the electronic submission of performance information and importation of updated EBVs. The "BREEDPLAN Compatible Software Tips" provide specific advice regarding the use of these herd recording programs when using them for your BREEDPLAN recording. Note - The following tip sheets have been provided by the software company marketing the program. Should you have any queries and/or require any further assistance, please contact the software company directly.
