ET Calves

	Dam Ident	Sire Ident	Date of Birth	Sex	Ident	Recip Dam Ident	Date of Birth / Calving Year	Breed
1	ABCC1	BCDD1	31Jul10	Bull	ABCF1			
2	ABCC2	BCDD2	30Jul10	Bull	ABCF2			

1. Calf Details

The genetic dam, sire, date of birth, and sex of each embryo transfer calf (as recorded with your Breed Society/Association) are preprinted on the forms. If any of these details are incorrect, please provide the correct details to your Breed Society/Association.

2. Calf Ident

The Breed Society/Association ident of each embryo transfer calf is preprinted on the forms.

3. Recipient Dam Ident

If the recipient dam has previously been recorded with your Breed Society/Association, the recipient dam's Breed Society/Association ident should be entered in this column. If the recipient dam has not previously been recorded with your Breed Society/Association the recipient dam's tag or tattoo should be entered in this column.

4. Date of Birth / Calving Year

Information regarding the age of the recipient dam should be entered in this column. If the recipient dam's date of birth is not known, an approximate calving year should be entered. This is important as BREEDPLAN makes adjustments to the performance of a calf based on the age of their recipient dam.

5. Breed

The breed of the recipient dam should be entered in this column. If the recipient dam is a crossbred animal the specific cross is required. For example, if the recipient dam is an Angus / Hereford cross "AAAAHHHH" rather than "AAAA cross" should be entered. For assistance in completing this column please see the attached list of breed codes.

BREEDPLAN – STANDARD BREED CODES

CODE	BREED	CODE	BREED
AA	ANGUS	MS	MILKING SHORTHORN
AF	AFRICANDER	MU	MAINE-ANJOU
AL	AUSTRALIAN LOWLINE	MZ	AUSTRALIAN MILKING ZEBU
