

# INTERPRETING YOUR SUGGESTED WEIGH DATE REPORT

Date: 1-JAN-2010 ← <b>1</b>							Page: 1		
Suggested Weigh Dates For Herd ABC									
Year	Sex	Season	----Birth Dates----		Number in group	200 Days	400 Days	600 Days	
			First	Last					
2010	F	Spring	16-SEP-10	02-NOV-10	10	21-APR-11	07-NOV-11	25-MAY-12	
2010	M	Spring	14-SEP-10	03-NOV-10	7	28-APR-11	14-NOV-11	01-JUN-12	

### 1. Date

This is the date the Suggested Weigh Date report was created. The information contained in the Suggested Weigh Date report is a reflection of the calves that were recorded with your Breed Society /Association on this date.

### 2. Group Description

A description of each group of animals is provided. Specifically, the year of birth, season of birth & sex for each group of animals is listed.

### 3. Birth Dates

The range of birth dates represented within each group of animals is outlined.

### 4. No. of animals

The number of animals represented with each group of animals is specified.

### 5. Suggested Weigh Dates

The Suggested Weigh Dates for each group of animals are listed. These are simply the dates when the calves in each group are on average 200, 400 and 600 days of age, based on their birth dates. They should be used as a guide to the optimal time to record the post birth weight performance of your animals.

**Note:** As an interpretation of this information, the herd in the above example should try to record the 200 day weight performance for the 2010 spring drop calves around the end of April 2011, the 400 day weight performance at the beginning of November 2011 and the 600 day weight performance in late May/early June 2012.
